STELLINI
Italian Style In Ticking Since 1947

This is Stellini

ITALIAN STYLE, GLOBAL VIEW

Stellini has been a frontrunner in the field of mattress textile innovation since 1947, when the company was founded. Quality and comfort are important factors. For this we work together with passionate professionals who are constantly looking for new possibilities and techniques.

Our people work with attention to detail and a deep understanding of the property of bedding fabrics. In this way we produce a top product that makes the difference for end customers.

Together we are Stellini.

Our people work with attention to detail and a deep understanding of the property of bedding and furnishing fabrics. In this way we produce a top product that makes the difference for end customers.

INNOVATION

Discover our Add-ons

MA_100%PP

100% POLYPROPYLENE KNITTED FABRIC

At Stellini Group, we have developed a new double jersey knit made of 100% polypropylene fibre from a production process with less environmental impact using clean, renewable energy. Our aim is always to develop new innovative but consciously designed products.

With this new product, it will now be possible to obtain upholstery fabrics that exploit the properties of polypropylene while retaining the elasticity and easy wearability of knitted fabrics. The result is a knit that is lighter than water, soft to the touch, completely recyclable and durable.

This product was awarded in the **“High Product Quality”** category of the **Interzum Award 2023** competition.

SUPREME GREEN COTTON

TRACED AND CERTIFIED ORGANIC COTTON

The fabric we make comes from carefully selected non-GMO cotton, grown using sustainable practices on family farms in Greece. It is ginned separately in the same area where it is grown: the bales of cotton leave the ginning mill for the spinning mills, located a few kilometres away, where the cotton is spun. All SUPREME GREEN COTTON fabrics produced from STELLINI are accurately selected and certified from the mother company in Greece. After the approval, the fabric is ready to be used for any of your projects.

HYBRID_

NATURAL + TECHNICAL

Hybrid qualities are produced with a mixture of natural yarns and technical yarns. The balance between these elements confers to the fabric's better performance. Fabrics with a maximum array of functions that can be used in a wide variety of applications due to their good specific properties and limited environmental impact.

ULTRASONIC BORDERS

FOR MATTRESSES

Thanks to the acquisition of a new ultrasonic-cutting machine, STELLINI now introduces the possibility of making quilted borders: the result is a readymade product, ready to be used and distributed in rolls for the production of mattresses. As with the regular borders, the “ultrasonic borders” can be customised in design and fabric colour, plus the overprinted quilting design.

SEAQUAL INITIATIVE

FABRICS MADE WITH SEAQUAL MARINE PLASTIC

SEAQUAL INITIATIVE is pursuing a dream that we want to make a reality: ridding the oceans of plastic and marine litter. The project is based on the recycling of plastic so that it can be used in the production of a new yarn, the SEAQUAL® YARN.

TENCEL X REFIBRA™

CONTRIBUTION TO CIRCULAR ECONOMY

Give waste a second life.

TENCEL™ Lyocell fibers with REFIBRA™ technology are made from a substantial proportion – up to one third – of pulp from cotton scraps that would otherwise have gone to waste combined with wood pulp. It's a new basis of making textiles that has a better impact on the environment.

SEACELL

POWER FROM NATURE

SEACELL is a fiber made from renewable resources wood and seaweed – using methods that save both energy and resources.

The fibres are obtained from natural, non-chemically treated resources. The fabric is delicate on the skin and protects against irritation, itching and inflammation, especially in sensitive skin. All SEACELL fabrics produced from STELLINI are accurately selected and certified.

ECOVERO™

LENZING ECOVERO VISCOSE

The sustainable viscose fiber. Derived from certified renewable wood sources using an eco-responsible production process by meeting high environmental standards, STELLINI fabrics containing LENZING™ ECOVERO™ fibers are an eco-friendly solution for your best project involving viscose fabrics. Let's contribute to a cleaner environment.

RE-USE

MESSAGE IN A BOTTLE

Typically, plastic bottles are made from PET, which is a highly recyclable material. Polyester yarn is one of its promising new applications and we are excited to put it into use with our Re-Use fabric.

More than just finding a new life for waste, it is the way it is produced and how it can be reused that makes Re-Use so unique: the production process of the fiber reduces soil contamination, air and water pollution; Saves natural resources and energy; Is endlessly recyclable.

INSPIRATION

Visit Our Rooms

Innova

More than just fabric

Innova explores the limits of technology but with great attention to sustainability.

Technical textiles where innovations are integrated to improve functionality. But also sustainable fibers such as organic cotton. Premium fabric for the added value seeker.

Essenza

More than just fabric

Essenza is inspired by the straight and unreserved Mediterranean lifestyle and its rich history. Think of ancient craftsmanship and warm colors – infused with an exotic, bohemian vibe and a touch of ethnic magic. Characterized by its honest simplicity but with attention to subtle details and graphic patterns, Essenza is a budget friendly collection. Basics without compromising on quality.

stellinggroup.com

Eccellenza

An ode to eccentricity

Eccellenza, that's exclusivity in its purest form. For personalities who dare to look beyond the limits of imagination. For lovers of a traditional feel, luxury and refinement.

The Eccellenza style is characterized by its ornamental, eclectic motifs and the use of high-quality, more exclusive materials.

Eleganza

More than just fabric

Moon and planet inspiration. Elegant and quiet, yet refined. Sophisticatedly neutral. Mineral surfaces with a shimmery touch. Pearly, chine fabrics remind of the moon's glow.

Crater-like objects. Rammed earth. Imitation of the satellite structure. Luxurious aspect in all its soberness.
